How are Prawns Sized?

Count Chart - The 'count', refers to the individual number of prawns which mostly makes up one pound (**lb**). A label of 16/20 means that there are between 16 to 20 of these prawns in a pound.

To covert lb to kg, multiply by 2.2046kg

Count lb	U15	13/15	16/20	21/25	26/30	31/40	40/60	51/60	60/80	80/120
Count kg	<33	28-33	35-44	46-55	57-66	68-88	88-132	112-132	132-176	176-264
General Guide	Colossal		Jumbo		Large		Medium		Small	

Raw whole prawns, packed as 800g, are graded to the packet.

Count size per 800g	4/6	6/8	8/12	13/15	16/20	21/25	26/30	31/40	41/60	60/80
---------------------	-----	-----	------	-------	-------	-------	-------	-------	-------	-------

THE SMALLER THE COUNT, THE BIGGER THE PRAWN

*Not actual size, use as a visual reference only.

Benefits of Frozen:

- Freezing preserves the quality, freshness, nutrition, colour and flavour of prawns.
- Frozen prawns have less wastage as they can be defrosted when you need them.
- Fresh prawns have 1-3 day shelf life, frozen prawns have 18-24 months shelf life
- It is rare to buy "fresh" prawns in New Zealand, often you are purchasing thawed prawns.
